**Your Review:**

*I first read about this book on Oprah's website. It was written in a way I wasn't used to - a bit dry and matter-of-fact - and I had a hard time getting into it at first. But one day, about halfway through the book, I caught myself thinking about the characters and what would happen next in their stories. I would recommend it to those who are willing to complete the book even if they aren't enthralled at the very beginning. It's worth it.*
