J.S

**Grade:**

7

**Title:**

Unscruwed

**Author:**

Ed Sobey

**Genre:**

general

**Write a review of the book, including plot points, if you wish:**

This is a brilliant nonfiction book about how to carefully disassemble all sorts of different electronics. From floppy drives, to mice, to laptops. What tools you need, what you can do with certain parts once you took them off... everything to do with it. After taking something apart using the instructions, I was surprised at how accurate they were. For anyone who likes building things, this is the book for you!

**Similar authors or titles?:**

None.
